1926 Cost	Unknown
Price Change	

## Innovations

- There are many refinements that this car has, including:
- Very low center of gravity (which enables speed on turns)
- Improved gauges
- Large seat and leg room

## Custom-made Speedster

This custom-built 1926 speedster was engineered and built by Bill Barth. Bill is a very well-known Model T mechanic and restoration expert who built this car especially for his son, JP. With great regret, JP passed away prior to the car being fully completed.

Bill has many achievements to his credit. Each year the Model T Ford Club International (MTFCI) judges Model T's for authenticity and accuracy. This judging culminates with naming the finest example as "The Stynoski Winner." Bill is renowned for restoring many of the Stynoski Winners. You can visit the Stynoski Award Wall in the southwest corner on this floor of the building. Congratulations to Bill for creating many of the Stynoski Winners!

## Bill & Jean Barth

Donated by Bill and Jean Barth in very fond memory of their son, JP. JP is pictured below.
